Dear Matthew Hane:

The Department has reviewed the proposed facility project and modelling regarding the replacement of post curing operations which will modify the process emissions at Saint Gobain Performance Plastics – McCaffrey Street in the Village of Hoosick Falls, NY.

After the review the Department has approved the modification as stated in the April 2, 2012 letter to the Department. The facility is responsible to remain within production caps to limit emissions on a short term/annual basis, this is reflected in the modeling report submitted to the Department as of May 8, 2012.

If you have any questions regarding this please feel free to contact me at (518) 357-2359 or email dawelste@gw.dec.state.ny.us.

Sincerely,

Don Welsted
Environmental Engineer
